Our story

Since 2014, our local team has harnessed kiwi ingenuity and innovation to design cutting-edge electric vehicle charging systems that our drivers can rely on to power their vehicles.

With over 2,500 units installed so far, our NZ-made EV chargers and software help ensure your vehicle is charged efficiently, affordably, and with the lowest possible impact on both the electricity grid and the environment.

00-1

Charge faster at home

Our intelligent EV chargers deliver a reliable charging experience at home, with the option to be installed by our certified team of EV charging experts. They're fast, dependable, and safe.

- ➔ EFFICIENT EV CHARGING (UP TO 40KM RANGE/HOUR)
- ➔ UNIVERSALLY COMPATIBLE SOLAR CHARGING
- ➔ HOME OVERLOAD PROTECTION

00-2

Future-proof your apartment

Often these buildings have energy constraints and require smart technology and specialist EV charging experience. We'll help you understand the important factors to consider.

- ➔ LOAD BALANCING FOR LIMITED ENERGY SUPPLY
- ➔ SCALABLE FOR ADDING CHARGERS AS REQUIRED
- ➔ RECORD USAGE AND RE-BILL TO TENANTS

00-3

Choose your colour

The E2 colour range pays tribute to New Zealand's stunning natural beauty through a palette of inspired colours that capture the essence of its diverse geography.

○ Snow

● Volcanic

● Sand

● Stone

Your EV charging assistant

Our hardware is backed by our powerful NZ developed driver app to bring you actionable insights that assist with your day-to-day charging needs.

An easy setup-and-forget process helps optimise your charging schedule without relying on your phone for everyday use. Simply review a summary of your charging sessions to accurately track your charging costs, charging emissions, use of solar export, and more!

- ➔ OPTIMISE YOUR CHARGING SCHEDULE
- ➔ CONTROL YOUR SOLAR CHARGING
- ➔ GET ACCURATE COST REPORTS
